Thanks Ana. I've forwarded this doc to Rea and Essex for their review and comment. Should be able to have it by COB tomorrow.

Hi Jonathan,

Thank you for contacting me. I was about to send you an e-mail as well.

First, let me answer your questions. We are still working on the problem formulation documents. The release date has change a bit to early next year, but I don't have a clear deadline.

Unfortunately, we can't provide curtesy copies of the problem formulation until the documents are placed in the docket. I can send you an e-mail once the problem formulation is available and a link to the docket.

I was going to contact you to let you know that we'll be adding a memo to the docket summarizing the site visit, which I'm attaching here for your review. If you can send me comments by COB tomorrow, that would be great.

Thank you,

Ana

**Subject:** Problem Formulation for NMP

Hi Ana,

I hope this email finds you well. I was reminded earlier today that EPA's problem formulation for the NMP Risk Evaluation is due later this month. I have a call scheduled on another topic with my magnet wire team next week and was wondering whether it would be possible to obtain a courtesy copy of the problem formulation prior to that so I could share with them? If not, is there a summary I can share? I imagine you all must be pretty close to final language at this point...

Thanks
